

PharmAcademic Release Notes: April 2025

Electronic Resident Development Plan

New Help Center Articles: Managing the Electronic Resident Development Plan and Completing the Electronic Resident Development Plan

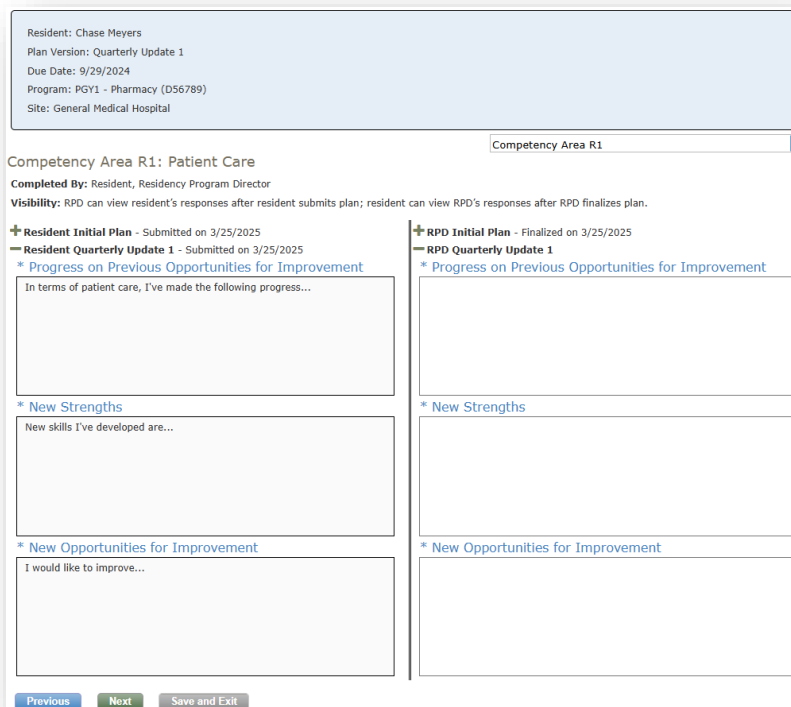

The Electronic Resident Development Plan in PharmAcademic is available and will be assigned to all 2025-2026 residents, unless Residency Program Directors opt out before resident enrollment.

Residents and RPDs can access the Electronic Resident Development Plans via their PharmAcademic Task or by navigating directly to the updated Development Plan Tab (Residents Tab > select resident > Development Plans). Designees, while not receiving email notifications or tasks, can still access and complete plans on the Development Plans tab.

The recommended process for completing the Electronic Resident Development Plan is for Residents to complete and submit their portion of the plan first. RPDs will then review the resident's assessment, add their response, finalize the plan, and add optional supporting files.

The electronic form allows users to see prior plans and provides a side-by-side, read-only view of the resident's and RPD's assessment. RPDs can view the resident's assessment once the resident submits the plan. Residents and all other relevant parties can view the RPD's responses as part of the complete plan, after the RPD has finalized it.

A new comprehensive email will be sent to RPDs on the 1st and 15th of each month that alerts them to all outstanding Electronic Development Plans for all the residents in their programs. For tracking purposes, RPDs can utilize the Resident Dashboard and the new "Overall Electronic Resident Development Plan Status" report located on the Program Reports tab to track the status and view submission data for all residents in the program.

Resident: Chase Meyers
Plan Version: Quarterly Update 1
Due Date: 9/29/2024
Program: PGY1 - Pharmacy (D56789)
Site: General Medical Hospital

Competency Area R1: Patient Care

Completed By: Resident, Residency Program Director
