

PharmAcademic Release Notes: October 2024

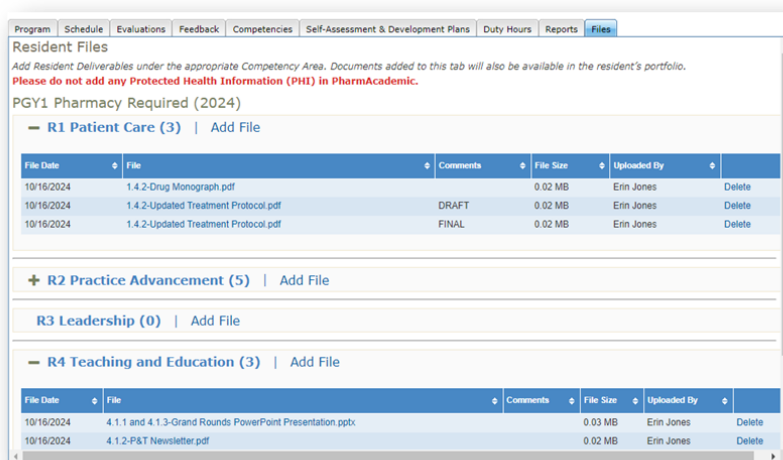

Updated Resident Files Tab with Competency Areas

Help Center Article: Adding Resident Files

The Resident's tab in PharmAcademic has been redesigned to allow programs to upload Resident Deliverables according to the associated Competency Area. For each resident, there is now a "folder" for each competency area from the resident's Required Competency Areas, Goals and Objectives (CAGOs).

There is also a Miscellaneous folder for all other resident-specific files. All files that were uploaded to PharmAcademic prior to the update will be in the Miscellaneous folder.

The plus and minus signs next to the Competency Area will expand and close the folders. Next to the Competency Area, you will see a count of how many files have been added to the folder.

Program | Schedule | Evaluations | Feedback | Competencies | Self-Assessment & Development Plans | Duty Hours | Reports | **Files**

Resident Files

Add Resident Deliverables under the appropriate Competency Area. Documents added to this tab will also be available in the resident's portfolio.
Please do not add any Protected Health Information (PHI) in PharmAcademic.

PGY1 Pharmacy Required (2024)
