

PharmAcademic Release Notes: July 2024

Dashboard Analytics

On the Analytics Dashboard, added clarifying text specific to each data set to alert users that the data is displayed by Survey Year. For example, “Data is displayed by survey year, and the ASHP Annual Accreditation Report collects resident information from the previous residency year. For example, the resident count displayed for survey year 2023-2024 represents residents from the 2022-2023 residency year.”

APR

- When closing an APR from the Preceptor tab, the user is now returned to the Preceptor tab.
- Updated validator on *printed* APR from for committee appointments to NOT-flag if preceptor has the required number of current examples + example(s) from the past. (Flag was working correctly in live form.)
- Added character limit validation to all short text fields on APR to avoid users receiving errors for adding items that are too long.

Duty Hours

Allowed Designees to Send Back for Edit Duty Hours forms via the resident's Duty Hours tab.

New/Updated Text & Documents

- Added a Tool Tip to the Dashboard Evaluations Tools tab for the Not Submitted Column, “All delivered, unsubmitted evaluations (regardless of due date).”
- Added text to Resident close out files to list acceptable file types.
- Removed red text displaying for Community-Based Pharmacy programs alerting RPDs to the changes in Self-Summatives (affective with the new Standard.)
- Updated Tool Tips/pages in PharmAcademic and on summative evaluations to remove out-of-date standard numbers.
- Added text to Clin login page (test environment) directing users to correct PharmAcademic website. This was done to alert users who accidentally find our test environment using a Google search.
- Added ASHP Resident Entering Self-Assessment template for Med Systems Operations programs.
- On the Learning Experience Activities tab, updated the Example Learning Activities document to the 2024 version.
